

Date: _____

Name: _____

Health Insurance Provider and Policy Number: _____

Dear Insurer,

I am presently seeking Homeopathic treatment for my health concerns from a Homeopath (Hom) registered with the College of Homeopaths of Ontario (CHO) and the Ontario Homeopathic Medical Association (OHMA).

Homeopaths have been regulated since April 1st, 2015, by the Government of Ontario under the Homeopathy Act, 2007, and the Regulated Health Professions Act (RHPA) 1991. Homeopaths (Hom) are recognized and acknowledged as healthcare professionals in Ontario with the same status as other RHPA Colleges.

Homeopaths must demonstrate competency in their education and training for registration with the CHO to ensure that the public receives safe, effective, and professional care. The successful completion of the registration process provides public protection that conforms with the College standards and guidelines, which includes a legislated complaints process.

Homeopathy is an effective and gentle system of medicine used worldwide and incorporated into the healthcare systems of many countries. It is the world's second-largest healthcare system recognized by the World Health Organization (WHO).

Homeopathic treatment is cost-effective for employers, insurance companies, and the Canadian (Ontario) Health Care System. Many insurance companies recognize it as a therapeutic benefit in preventative health care and treating health conditions.

Hence, I request that my homeopathic treatments be recognized and included in my Health Insurance benefits package so I can receive the help needed for my health care and concerns.

I thank you in advance and look forward to hearing from you.

Sincerely, _____
